FYI,

Just when life knocks you down, someone out of the blue picks you up.

Thanks for allowing me to do what I do.

Andy

Hey, Blair!!!

I just figured I would drop in and see how things have been going. And give you feedback on how things have been going.

I won't lie, I really miss the class. You always made it so enjoyable. I can remember when you took over the class. I was so excited. We all were excited. You do an awesome job. You did an excellent job on giving me information to take along with me. In my case, it made me ready for the next step on furthering my education. Keep your awesome work up!

Here recently I made the Dean's List. And to be able to make the Dean's List you have to have a 3.50 GPA minimum. And I earned a GPA of 3.67. I was tickled to death when I found out that I did that well. I earned that GPA from Air Brakes & Air Systems. I finished the class with an A- and we took our certification test for Air Brakes & Systems and I passed the test with flying colors. Which as well made me happy. Since I have been down here I now have 2 new certifications under my belt.

This school is amazing. The instructors know their stuff. Just the only down fall is, there isn't anything to do here for fun. Other than that, UNOH is worth it. If you have been suggesting to students to come here to be technicians, keep doing it. It's worth it. It is an accelerated program, but if the interest is there, they will catch on and learn the material. Both their Auto and especially their Diesel programs are right on the money. And new word that is out, there is going to be a lift truck program. Crown is the name of the lift trucks. Kinda cool I thought. Anyways, if you have been suggesting to students that are interested in making this a career, UNOH is awesome.

I hope things have been going well with you and MacArthur. Please give everyone a hello for me. Possibly rattle up Ray for me. Haha.

If I had any advice for you to pass on to your classes. The number one thing is, pay attention in your class. Take

advantage of the information you are teaching them. If they do, when they continue to take the next step after High School, they will be doing good. Work hard, pay attention, and especially no sleeping in class. I highly recommend for them to not sleep in class if they come here. The instructors will send them home for the day.

Every day, I am thankful for taking your class and taking advantage of all the information you taught me. There is no way I can claim to take everything I know upon myself. You deserve a TON of credit. You did an excellent job! I commend you for what you are doing. You are an excellent teacher, a role model. I enjoyed how you could be a teacher, but yet you could connect with your students. I really liked that. All of my favorite High School memories are from your class. You were and still are my favorite teacher.

I know this is rather long, but keep your amazing teaching skills up! You again, are an awesome teacher!

With best regards,

Tyler Burrell
